

high density filing

masterfile

a. masterfile 2

MasterFile 2 is the high-density filing system that allows quick and easy document storage and retrieval. Warranted for 5 years. Individual documents are attached to self-adhesive, pre-punched carrier strips which are hung vertically from a set of pins and posts inside the MasterFile 2. Carrier strips allow documents to hang straight, eliminating fingerprint smudges and dog-eared corners. Stored at a comfortable height for easy access, document retrieval is a simple process that requires no stooping or bending. MasterFile 2 holds up to 1600 3-mil original documents. Insulated double wall steel construction provides excellent document protection. No assembly required.
