

Air Monitoring

Portable Air Sampling Pump

Portable Air Sampling Pump	Order Code 1949	NH (7)
Carrying Case	Order Code 1705	NH (5)
Optional 110 AC Adapter	Order Code 1744	NH (1)
Optional 220/50Hz AC Adapter	Order Code 1778	NH (1)

Code 1949

LaMotte's Model BD Air Sampling Pump is durable and simple to use. The diaphragm vacuum pump draws the air sample through the absorbing reagent in the impinger. A constant rate can be maintained (between 0 and 2.0 liters per minute) and an integral flowmeter controls the amount of air sampled. Operates up to 48 hours on 4 size "C" batteries.

- optional AC adapter is available
- pump includes a general purpose impinger

Combination Air Quality Testing Outfit

Grades 6 and up

Combination Air Quality Testing Outfit	Order Code 5960-P	HF (23)
Outfit without Air Sampling Pump	Order Code 5960	HF (18)
Reagent Refill	Order Code R-5960	HF (4)

Contains all the necessary components to measure 6 key pollutants in air.

- portable air sampling pump in its own carrying case
- 3 types of impingers
- individual test modules with all necessary labware and reagents for 25 tests
- detailed instruction manual

Factors

Ammonia	Hydrogen Sulfide
Carbon Monoxide	Nitrogen Dioxide
Chlorine	Sulfur Dioxide

Code 5960-P
