

Ergonomic Back Support Belts

Ergonomic, lightweight back support belts with detachable suspenders

High quality back support belts are used in all heavy materials handling in work environments such as transportation, warehousing, construction, manufacturing, health care, forestry, utilities, food processing, farming and others. Reduces the risk of low back pain and work-time loss.

The ergonomic back support belt not only prevents job-related back injuries and repetitive strain injuries, it also reduces fatigue with abdominal lift support. Now with detachable straps.

Made with the finest quality material and workmanship. The ergonomic back support belt represents a first class investment in worker safety and productivity.
