

Quiksite® Infrared Thermometers

H-B infrared thermometers are highly accurate and easy to use. We offer a variety of styles with multiple functions for any application. Ideal for use in pharmaceutical and other laboratories, automotive, colleges and universities, food service and storage, cooking, research, chemistry, biology, HVAC, and anywhere contamination is detrimental and temperature readings are critical or difficult to reach.

- Rugged, pocket sized design.
- Made in the USA.
- CE Mark Certified.
- Battery included.
- Individually packaged.
- Optional carrying case available. Non-contact infrared technology makes quick, accurate temperature readings in seconds. Useful in pharmaceutical research, food service, petrochemical, & many other industries. Optional laser sighting produces a red spot parallel to the measured target.

Item #	Range	Accuracy	Optic Ratio (with 1" Min. Target)	Response Time
900	-18 to 315 °C	2% of reading or 2°C (whichever is greater)	3 : 1	1 sec.
900LS	-18 to 315 °C	2% of reading or 2°C (whichever is greater)	3 : 1	1 sec.
