

waterproof socks & gloves

SealSkinz® Advanced Patented Engineering

SealSkinz® MVT (Moisture Vapor Transpiration) Waterproof Socks and Gloves are designed to protect hands and feet from wet, cold, inclement weather. SealSkinz® patented MVT design features three-layers of the latest state-of-the-art materials to provide your customers with the best in waterproof protection.

How It Works:

- SealSkinz® proprietary 3-layer system has an abrasion resistant outer layer of nylon/Lycra® for durability and to prevent socks from sliding down and losing their shape.
- The waterproof MVT membrane lets perspiration out while preventing water from coming in.
- An inner layer of DuPont® fabric wicks away perspiration from the skin to increase comfort. Coolmax® fiber enhances the MVT action by diffusing perspiration over a wide surface area to allow perspiration to evaporate quickly.

**All SealSkinz® are
WATERPROOF! Completely
waterproof and breathable to keep
your hands and feet dry.**

All-Season Socks

Mid-calf height (11"). Perfect for anywhere and whenever you need to stay dry.
Available in Black #1000 Sizes S- XL

Over-the-Calf Socks

Available in Black.#1500 Sizes S- XL

Gauntlet Gloves

This almost-elbow-high glove is designed for increased dryness in the wettest of conditions.
Available in Black. #1600 Sizes S- XL

waterproof socks & gloves

ChillBlocker™ Gloves

Wrist-high waterproof glove is insulated with a liner made of expedition-weight double velour Polartec® Power Stretch™ fleece (7.3 oz. Per square yard). The outside layer is knit of nylon/lycra® spandex offering a durable, flexible, stretch covering. The palms are covered with a gripping pattern of unique abrasion resistant dots. In between the two fabric layers is our waterproof MVT membrane. These three layers are securely bonded together throughout. This combination of materials provides a very soft, comfy, warm, stretch-to-fit glove suitable for a whole host of cold, wet, nasty outdoor conditions. Whether you are hunting, ice fishing, skiing, boating, and military service— try our New SealSkinz® ChillBlocker™ Gloves.

With full dexterity and gripper dots for added gripping power. These Gloves are made to be slightly larger than our regular SealSkinz® Glove for extreme cold conditions. If you prefer a snug fit, then order one glove size smaller than usual in ChillBlocker™ Gloves

Available in Black #1700 Sizes S- XL

ChillBlocker™ Socks

This Mid-calf-high waterproof sock is insulated with a liner made of expedition-weight double velour Polartec® Power Stretch™ fleece (7.3 oz. Per square yard). The outside layer is knit of nylon/lycra® spandex offering a durable, flexible, stretch covering. In between the two fabric layers is our waterproof MVT membrane. These three layers are securely bonded together throughout. This combination of materials provides a very soft, comfy, warm, stretch-to-fit sock suitable for a whole host of cold, wet, nasty outdoor conditions. If you are outside in cold weather doing such activities as hunting, ice fishing, skiing, boating, and military service – you will be pleased with our New SealSkinz® ChillBlocker™ Gloves.

Available in Black.#1300 Sizes S- XL

Advanced Waterproof Protection

SealSkinz® socks have a patented fabric structure of three highly engineered layers including a membrane capable of allowing perspiration to escape while not allowing water to penetrate. Each sock is high-pressure tested to make sure there are no leaks.

Care

Hand-wash and drip-dry for the greatest longevity. Do not twist or wring. Or machine wash on low temperature and tumble-dry on low. When machine drying, reverse socks halfway through.

SealSkinz® ChillBlocker™ Socks and Gloves*

Have a patented fabric structure while replacing the inner liner with a warm Polar Fleece-lining. They still maintain waterproof ability while adding increased protection from the cold. With “Gripper dots” and tested at 30 degrees below F.
